## Two new distribution contracts

**Aiming to an international development, One RF Technology, radio frequency solutions designer, announces distribution contract signature with companies Erco & Gener and RF Solutions.**

Persevering in its policy of international establishment, One RF Technology reinforce its Europeand distribution network with the signature of commercial partnership with two of the most experience companies of thier respective countries: Erco & Gener (France) and RF Solutions Ltd (UK and Ireland). Respectively based in Saumur and Lewes, Erco & Gener and RF Solutions already apply themselves to represent One RF Technology trademarks and products beside their various prospects and customers.

A durable industrial experience as well as an important know-how has been the essential criteria of One RF Technology's choice of these two companies in the world of wireless communications. Distributors aim to contribute to the implementation and success of numerous project integrating one or several radio frequency solutions in the markets of automation, security and industry.

Guaranteeing the perennality of ex-Adcon products and launching compatible and performance-improved new products, One RF Technology intends well to take a significant market share to thus give to its distribution network all means to succeed.
