

FOR IMMEDIATE RELEASE

en

4th March 2005

One RF Technology signs with two new distributors.

With the beginning of 2005, One RF Technology, developer of radio frequency solutions, strengthens its international development policy with the announcement of a distribution contracts signature with companies ARAZIM and A.R.T.

Persevering in its world scale policy establishment, One RF Technology strengthens its distribution network beyond European continent borders with the signature of commercial partnership with two of the most experienced companies of their respective countries: Arazim (Israel) and A.R.T (Czech Republic).

These new partners, leaders in industry market of their countries, will be One RF Technology brand and product representatives. An important know-how as well as a durable industrial experience has been the essential criteria of One RF Technology's choice of the two companies in the world of wireless communication. The new distributors aim to contribute to the implementation of radio frequency projects, support new release of high-performance product and totally compatible with ex-Adcon product.

One RF Technology not considers these partnerships as an achievement and intends to spread its world scale policy in a significant way.

About Arazim (www.arazim.com)

Arazim Ltd. is a technically oriented Rep & distribution company with intensive activities at the RF ISM band especially at the short range data transmission applications. Arazim can provide expert local technical support from the RFIC level, via the RF module level and upto the system level including accessories, antennas, cables and so on.

About A.R.T. (www.artbrno.cz)

Advanced Radio Telemetry (A.R.T.) has been active in the radio branch since 1995. The company produces radio telemetry systems and make business with radio data equipment. A.R.T. is the leader in quality low power data radios on the market in the Czech and Slovak Republic.
